Tripleopolis: Match, Merge, and Build!

Build your medieval city in this simple yet addictive match, merge, and build puzzle game. Combining classic match-3 gameplay with fresh twists and strategies, Tripleopolis tests your puzzle-solving skills as you expand your city.

- **Hidden depths and challenges:** From lightning strikes and obstacles that challenge you to coins and rare items that help, Tripleopolis offers layers of strategy to maximize your score and grow your city.
- **Two tile types for deeper strategy:** Place and merge Wood and Stone tiles, adding complexity and tactical decisions to every game.
- **Diverse maps:** From quick, bite-sized puzzles to larger, more immersive city-building challenges.
- **Pesky Fox challenge:** Outsmart the unpredictable Fox tile as it disrupts your strategy and keeps you thinking on your feet.
- **Crafted with Care:** Built entirely from the ground up with no game engines, Tripleopolis is a labor of love by an indie developer. Free from ads, the game focuses entirely on providing a pure, enjoyable experience for players.

Tripleopolis delivers a unique match-3 experience that's easy to play, yet challenging to master. Download now on iOS and Android to start building your medieval empire!
